Work Experience

Web Developer – Freelance Projects   2024 - Present

- **React Development:** Developed a responsive Watch Website using React, React Router, and Vite. Implemented dynamic routing, category filtering, search by name, and Grid/List view toggle. Built UI from scratch with custom CSS and ensured clean state management and interactive UX.
- **Full-Stack Development:** Extensive experience with Node.js, Git, Express.js, middleware, npm, EJS, and other web technologies. Built and deployed multiple full-stack web applications, optimizing both frontend and backend workflows.
- **API Development:** Experience in working with public APIs and building RESTful APIs with security best practices. Developed a Math Website that retrieves and processes data from a public API. Also created a Books API to store and manage book details, including titles, authors, and covers.
- **Authentication & Security:** Implemented authentication and role-based access control to enhance security. Ensured proper user data protection by integrating authentication mechanisms into backend services.
- **Database Management:** Skilled in designing, modifying, and managing databases. Can efficiently store, retrieve, and update data in backend applications. Built Web Note, a platform for saving and managing notes using databases.
- **JavaScript & jQuery:** Proficient in JavaScript and jQuery for frontend interactivity. Utilized these technologies along with HTML and CSS for dynamic UI manipulation. Developed several projects, including a Rock Paper Scissors game.

Technical Skills and Languages

Front End | [React.js](#), EJS, JQery, html, css, vanila Javascript
