NIKOLOZ EBRALIDZE

EMPLOYMENT

Web Developer – Freelance Projects	Self-Employed	2024 - Present

Full-Stack Development:
- Extensive experience with **Node.js, Git, Express.js, middleware, npm, EJS**, and other web technologies. Built and deployed multiple full-stack web applications, optimizing both frontend and backend workflows.

API Development:
- Experience in working with public APIs and building RESTful APIs with security best practices. Developed a **Math Website** that retrieves and processes data from a public API. Also created a **Books API** to store and manage book details, including titles, authors, and covers.

Authentication & Security:
- Implemented authentication and role-based access control to enhance security. Ensured proper user data protection by integrating authentication mechanisms into backend services.

Database Management:
- Skilled in designing, modifying, and managing databases. Can efficiently store, retrieve, and update data in backend applications. Built **Web Note**, a platform for saving and managing notes using databases.

JavaScript & jQuery:
- Proficient in JavaScript and jQuery for frontend interactivity. Utilized these technologies along with HTML and CSS for dynamic UI manipulation. Developed several projects, including a **Rock Paper Scissors** game.
